COURSE DESCRIPTIONS

In this section, courses are listed to show what is normally offered at Red Deer College. Some courses are not offered every year. Check the timetable to see if specific courses will be offered.

Each course is identified by the name of the subject, followed by a course number and a course weight. The instructor/student contact hours are also shown as well as the number of weeks the course normally lasts, the title of the course, and a brief description.

Example:
ACCT 206-3 (BC=4)
(3-1) 15 weeks Auditing

ACCT name of the subject, often an abbreviation
206 the course number which gives the course a unique identity
-3 the number which follows the dash is the course credit weight
(BC=4) the number of billing credits
(3-1) the instructor/student contact hours per week; 3 hours of class and 1 hour of lab
15 weeks the number of weeks the class runs
Auditing the title of the course

Assignment of Academic Credits, or Credit Weight, to Courses
Course credits are a measure of learning opportunities based on the number and type of instructional hours or equivalent learning experiences. For Red Deer College Diploma and Certificate courses, academic credits are normally equal to billing credits. For courses in University Transfer Programs, academic credits are normally equal to the credit given at university. This is usually equal to the number of lecture hours.

Definitions
Credit - The equivalent of 15 hours of class instruction. (Example: 1 hour per week for 15 weeks including the final exam period.
Course - A series of learning opportunities within a specific subject area to which a final grade is assigned.
Courses have a variety of learning opportunities, among which are the following:
Class - a series of learning activities aimed at acquiring theory.
   i) Activities in the class are directed by the instructor
   OR
   ii) Context based Learning
Lab - a series of structured learning activities to facilitate the application of concepts, theories and principles.
Seminar/Tutorial - a series of structured learning activities aimed at further exploration and application of concepts, theories and principles.
Clinical - a series of learning activities aimed at applying theory in prescribed clinical experiences.
Practicum - a learning activity aimed at combining theory with practical experience.
Field Work - an educational experience involving work of a practical nature acquired by students in a work situation.

Instructor/Student Contact Hours
The figures in brackets following the course title and number show the number of contact hours per week. The first figure is the number of class hours. The last figure is the number of lab hours. Seminar hours are identified with an S. Practicum, Clinical and Fieldwork are usually expressed as total hours.

(0-3) No classes.
(3-15-3) Three hours of classes, 1 hour of seminar, and three hours of labs per week.
(3/2) Classes on alternate weeks

Course Length
Length of courses may vary, see timetable for length of courses.
A term usually lasts 15 weeks, including the exam period. Courses lasting 15 weeks are called term courses.
Some courses last two terms, or 30 weeks. This includes two exam periods, one at the end of each term. These courses usually run from September to April. They are called full courses.

Prerequisites and Co-requisites
Courses listed as prerequisites must be completed before you start the course in question. For example, BIOL 297 lists Biology 30 or equivalent as prerequisite. This means that you must complete Biology 30 or equivalent before you can take BIOL 297. Courses listed as co-requisites must be taken at the same time as the course in question.
Note: You usually have to complete a junior course in the same subject before you can take a senior course. This is true even if it is not listed as a prerequisite. If you wish to register in a 300-level course without having taken at least one 200-level course in the same subject, check with an advisor.

Restricted Courses
Some courses are available only if you are admitted to a certain program.

Reserved Courses
Some courses are available first to students in a certain program. Once most students have registered, these courses are opened to all students.
You can find information on restricted and reserved courses in the College Timetable.

Communications  
Some Communications Studies courses are available through alternate delivery. Correspondence versions of COMM 150 and COMM 254 are available for students in distance delivery programs. On-line versions of COMM 140, COMM 250, COMM 252 and COMM 254 are available for students who have Internet access and who need an alternative to on-campus classes.  
Note: Alternate delivery is not available for all courses every year. To enroll in an alternate delivery section, please check the Timetable and select a course designated as “correspondence” or “on-line”.  

Placement Criteria  
Students should refer to their program requirements before selecting a Communications course. Students are advised that they will be required to take the College placement test before registering in COMM 250, 252, 254 or 256. As a Kinesiology and Sport Studies student, or an Education student with a PE major or minor, you need to take part in and appreciate a variety of activities, from your own and other cultures, to better meet the leisure and work needs of your clients. You will develop a personal foundation of physical activity, including appreciation, skill, analytical understanding, and knowledge about different activities. Physical activity is the “physical” in physical education.
